

LEGO CLUB

Lego Club takes place every Thursday and involves 12 industrious pupils. Lego Club may sound fun (and it is!) but it is also good at helping the children to learn.

It teaches them how to share and to be considerate of each other's needs as they swap bricks for individual or joint projects.

They also learn patience, as the pieces they are working on break easily and they have to rebuild them constantly! Sometimes the children have challenges – for example to build a tower or make an animal, but more often than not they design their own creations. It's amazing the diverse and imaginative constructions they build!
